Results-driven **Java Backend Software Engineer** with hands-on experience designing microservices-based enterprise systems, IoT telemetry pipelines, and scalable event-driven architectures. Backed by 1 year of academic instruction at Atmiya University, designing approved web and backend curricula. Proven expertise in Spring Boot, Apache Kafka, RESTful APIs, and multi-database optimization (MySQL, PostgreSQL, MongoDB). Eager to deliver high-performance backend systems at scale.

🧠 SKILLS

- **Languages:** Java | Kotlin | C/C++ | SQL
- **Backend & Frameworks:** Spring Boot | Spring Data JPA | Spring Security | Hibernate | RESTful APIs | Microservices | Event-Driven Architecture
- **Messaging & Databases:** Apache Kafka (Producers/Consumers), MySQL, PostgreSQL, MongoDB, Firebase, Query, Indexing
- **Cloud & DevOps:** Azure | AWS | GCP | Docker | Git | GitHub | CI/CD Fundamentals | CloudSim.
- **Soft Skills:** Clean Code Practices | System Design Thinking | Performance Optimization Mindset | Cross-Functional Collaboration | Requirement Analysis | Attention to Detail | Time Management | Adaptability | Continuous Learning

📁 WORK EXPERIENCE

Java Backend Developer (Contract Engagement), Bhakti Enterprise. 05/2025 – Present

- **IoT ERP Architecture:** Architected an enterprise SaaS system across 4–6 decoupled Spring Boot microservices for manufacturing, inventory control, and IoT-connected vending machines.
- **Telemetry Pipeline:** Engineered automated telemetry workflows streaming real-time diagnostic reports over the internet, allowing field engineers to resolve mechanical errors via a centralized web UI.
- **API Development:** Built and documented **50+ RESTful API endpoints** secured via Spring Security, stateless JWT authentication, and fine-grained RBAC.
- **Async Messaging:** Deployed Apache Kafka event brokers for high-throughput, non-blocking asynchronous transactions, ensuring real-time uptime monitoring for machinery and notification dispatches.
- **Database Optimization:** Designed normalized MySQL and PostgreSQL schemas, writing tuned queries to minimize latency under heavy transaction volumes.

Assistant Professor, Atmiya University 06/2025 – 04/2026

- **Curriculum Leadership:** Formally designed syllabi for *Advanced Web Technologies* (Advanced Java) and *AngularJS*, approved by the university's Board of Studies.
- **Instruction & Labs:** Delivered lectures and labs covering Core/Advanced Java, Multithreading, and RESTful API design; conducted vacation seminars on microservices architecture.
- **Infrastructure Management:** Managed physical lab infrastructure, coordinating practical sessions across Java, AngularJS, Android, Flutter, and AI subjects.

🎓 EDUCATION

M.Tech in Computer Engineering (Software Engineering) - First Class, Atmiya University, Rajkot 2023 – 2025

- Thesis: Hybrid Metaheuristic Approach for Optimal Load Balancing in Heterogeneous Cloud Environments

B.E. - Computer Engineering - Distinction, Marwadi education foundation 2020 – 2023

- Project: A Mobile-Based Fitness Tracking and Activity Monitoring System (Flutter)

Diploma - Computer Engineering, Atmiya Institute of Tech. & Sci. For Diploma Studies 2017 – 2020

📁 PROJECTS & RESEARCH

JobPilot, AI-Powered Job Search Platform (Personal Project) 04/2026 – 07/2026

- Designed a modular monolith on a Kafka event bus (job ingestion, resume-tailor, apply-service, tracking, API gateway) with a mobile-first Angular PWA frontend, integrating external AI APIs for automated resume tailoring and tracking.

Enhanced Optimization Model (EOM), M. Tech Thesis 05/2024 – 04/2025

- Developed a hybrid metaheuristic algorithm (PSO-WOA) implemented on Azure and tested using Java CloudSim/SimPy for intelligent VM load balancing; achieved an **18% reduction in makespan** and **12% CPU utilization improvement**.

📖 COURSES

[Artificial Intelligence](#) 🌐, Great learning

02/2025 – 04/2025
